Problem:

I found mold or mildew at the base of my walls or in the bathroom.

Solution: Mold and mildew are caused by excess moisture present in your unit.

Mold in Bathroom

1) Make sure wet towels and clothes are hung up or removed.

2) Run bathroom exhaust fan at lease 15 minutes after each shower.

3) Scrub stain using antibacterial spray like Lysol.

4) If mold persists, please contact management

Mold on Walls

1) Make sure furniture like beds and couches are at lease 6 inches away from the wall.

2) Make sure none of the appliances are leaking and creating excess moisture.

3) Make sure any wet clothing is run through the wash and dried appropriately.

4) Scrub stain using antibacterial spray like Lysol.

5) If mold persists, please contact management
